PROJECTS

JUSTIPIN - MODERN CONSIGNMENT SERVICE APPLICATION | Sep 2024 – Jan 2025

Justipin is a personal shopper app that makes transactions secure, simple, and transparent for students and the general public. With assured payment features, multi-orders, and service transparency, Justipin provides a practical and efficient transaction experience.

- Flutter is used in mobile app development to create responsive user interfaces.
- For effective business logic and API Express, the backend was constructed using Laravel. Integration of JSON for quick and safe payments
- Firebase for real-time alerts and user authentication
- Using OSRM to optimize routes for more accurate travel time estimation
- Prometheus and Grafana are utilized for real-time system monitoring.

ONLINE EXAM APPLICATION | Jan 2025 – June 2025

This web-based tool for managing online exams includes admin and instructor capabilities, as well as real-time monitoring. As a Full Stack Developer, I am responsible for the application's frontend and backend functionality.

- Realtime monitoring exam
- Exam schedule
- Value Recap
